

OCEAN OF DREAMS

A recent oceanfront project, Ocean of Dreams, in Fenwick Island is a second home for the owners, who plan to move in full time after retirement. Oursler used as many windows as possible to capture the serenity of the ocean and panoramic views from all angles - one of the main requests of the homeowners.

Nestled on a narrow lot, about the size of a townhome, the exterior features NuCedar siding in Bracing Blue, a Juliet balcony, a Pergola over the garage, and a spiral staircase leading to the rooftop deck with oceanfront scenery.

Packed with creative design elements inside and out, the kitchen features a custom island with butcher block top, farmhouse sink, open shelving, a separate coffee and wet bar, and high-end Sub-Zero and Wolf appliances. Oursler recessed the hood and incorporated clear pendants over the island in order to capture unobstructed waterfront views from the island.
